Workshop & Dealership Management System

User Manual

Version 1.0 • July 2026

Table of Contents

1. Introduction
2. Getting Started — Login & Navigation
3. Administrator — Full System Access
4. Customer Service Representative — Front Desk
5. Technician — Workshop Jobs
6. Inventory Manager — Parts & Stock
7. Finance Personnel — Invoices & Payments
8. Manager — Oversight & Approvals
9. Sales Rep — Leads, Orders & Deliveries

1. Introduction

The solution is a web-based workshop and dealership management system. It helps automotive businesses manage their entire after sales and vehicle sales services.

The system is organized into three core modules:

- After-Sales Service — Customer check-in, technician workflow, spare parts, invoicing
- Vehicle Sales — Inventory tracking, customer leads, sales orders, delivery handover

Who this manual is for:

- Customer Service Representatives (CSR) — Front desk, check-in, customer registration
- Technicians — Diagnose issues, work on jobs, request parts
- Inventory Managers — Manage parts catalogue and stock levels
- Finance Personnel — Generate invoices, record payments
- Managers — Approve invoices, oversee operations
- Sales Reps — Manage leads, create orders, handle deliveries
- Administrators — Full access, manage users, configure settings

2. Getting Started — Login & Navigation

2.1 Accessing the System

Open your web browser and navigate to the application URL: <https://aas-two-iota.vercel.app/>. You will see the login screen.

Login Screen — Enter your email and password to sign in.

2.2 Signing In

Enter your registered email address and password, then click "Sign in".

If you do not have an account, click "Create an account instead" to register. An administrator must assign your role before you can access the system.

2.3 Dashboard Overview

After signing in, the Dashboard displays key performance indicators, active jobs, and recent check-ins

Dashboard — KPI cards, and active jobs table.

2.4 Navigation

The sidebar on the left provides access to all sections. Sections are grouped:

- General — Dashboard, Appointments, Customers, Jobs
- Sales — Inventory, Leads, Orders
- Operations — Customer Vehicles, Parts, Finance, User Management

Your role determines which menu items you can see. The top bar shows your current location and provides dark mode toggle, notifications, and profile access.

3. Administrator — Full System Access

Administrators have unrestricted access to every feature. Your primary responsibilities include managing users, configuring system settings, and overseeing all operations.

3.1 User Management

Navigate to Operations > User Management to view, and manage staff accounts. Each user can be assigned one of seven roles that control their access level.

NAME	EMAIL	PHONE	ROLE	STATUS
Oselumese	oselumese669@gmail.com	-	Admin	Active
test	t@t.com	-	Technician	Inactive
test	test@t.com	-	Admin	Active
joe	joe@t.com	-	Manager	Active

User Management — View all staff, assign roles, manage access.

3.2 Role Assignments

The seven roles available are:

- Admin — Full system access
- CSR — Front desk, appointments, check-in
- Technician — Jobs, diagnosis, parts requests
- Inventory Manager — Parts catalogue, stock
- Finance Personnel — Invoices, payments
- Manager — Oversight, approvals
- Sales Rep — Leads, sales orders, deliveries

3.3 Finance Configuration

Configure VAT rate and labour types under Operations > Finance. These settings affect invoice calculations across the system.

Finance Settings — Configure VAT rate (default 7.5%) and labour type flat fees.

3.4 Parts Catalogue Management

The Parts Catalogue under Operations > Parts allow addition, item information update and restocking of spare parts, including CSV import for bulk data loading, stock adjustments, and low-stock alerts.

Parts Catalogue — Manage parts, stock levels, and import from CSVs.

3.5 Appointments

View and manage all customer appointments under General > Appointments. Appointments can be viewed by day, week, or month ranges.

TodayThis WeekThis Month+ Book appointment

DATE / TIME	CUSTOMER	PHONE	VEHICLE	COMPLAINT	STATUS	ACTION
Thursday, 23 Jul — 1 appointment						
17:00	Joe Eze	08012345678	-	-	Cancelled	
Friday, 24 Jul — 3 appointments						
09:06	Jay Ez	08012345678	-	-	Scheduled	Check in ×
12:05	Joe Johnson	08012345679	Toyota Prado S IKL-299-255	I need to check the car	Checked in	View job >
13:22	Joe Eze	08012345673	Toyota Prado IKL-299-212	Routine servicing	Scheduled	Check in ×

Appointments — Range view with day/week/month presets.

4. Customer Service Representative — Front Desk

As a Customer Service Representative, you are the first point of contact for customers. Your workflow covers customer registration, vehicle check-in, appointment booking, and managing the customer database.

4.1 Customer Management

Navigate to General > Customers to view the customer directory. You can search by name or phone number, view repair history, and add new customers.

The one-stop creation flow lets you add a customer, their vehicle, and a new job in a single process.

Customers — Searchable directory with repair history per customer.

4.2 Vehicle Check-In

Click "Check In Vehicle" from the Dashboard or navigate to General > Jobs > Check In. The 3-step flow captures vehicle details, customer information, and the reported issue.

Check-In Flow — 3-step process to register a new service job.

4.3 Appointment Booking

Under General > Appointments, you can book appointments for customers. Vehicle details (make, model, plate) and complaint are mandatory fields.

Appointments — Book and manage customer appointments with day navigation.

4.4 Customer Vehicles

View all vehicles registered in the system under Operations > Customer Vehicles. Each vehicle is linked to its owner and service history.

Jobs List — All workshop jobs with status, vehicle, and customer details.

5.2 Job Detail & Diagnosis

Click on any job to open its detail page. The status tracker shows the current stage of the job. You can record your diagnosis, request for parts, and transition the job through statuses.

Job Detail — Status tracker, diagnosis, and parts requests

5.3 Parts Requests

When parts are needed, create a parts request from the job detail page. The Inventory Manager will approve and dispatch the parts. Dispatched parts are automatically added to the job items and invoice.

Note: Technicians cannot view or modify invoice information. Parts requests are restricted to Finance personnel and Administrators.

5.4 Printable Job Card

Each job has a printable job card accessible via the Print button. This card shows vehicle details, diagnosis, and job details that can be printed for use in the workshop by technicians.

6. Inventory Manager — Parts & Stock

Inventory Managers are responsible for the spare parts catalogue, stock levels, and fulfilling technician parts requests.

6.1 Parts Catalogue

Under Operations > Parts, view the complete parts catalogue. Each part has a unique code, cost price, selling price, and stock quantity.

The screenshot shows the 'Parts Catalogue' interface within the Cedric Masters Autos Management system. The left sidebar contains navigation menus for GENERAL (Dashboard, Appointments, Customers, Jobs), SALES (Inventory, Leads, Orders), and OPERATIONS (Customer Vehicles, Parts, Finance, User Management). The 'Parts' menu is highlighted. The main content area displays a table of 30 parts with columns for CODE, DESCRIPTION, COST PRICE, SELLING PRICE, STOCK, REORDER, and ACTIONS. The table lists various automotive parts like Headlight Bulbs, Wiper Blades, Batteries, CV Joints, Clutch Kits, and Tyres. Each row includes 'Edit' and 'Stock' links. At the bottom right, a 'TanStack Router' logo is visible.

CODE	DESCRIPTION	COST PRICE	SELLING PRICE	STOCK	REORDER	ACTIONS
BUL-001	Headlight Bulb - H7 LED	N5,000	N10,000	15	6	Edit Stock
WIP-001	Wiper Blades - Set (Pair)	N3,000	N5,500	20	8	Edit Stock
BAT-002	Battery 80Ah - Heavy Duty	N35,000	N55,000	6	3	Edit Stock
BAT-001	Battery 60Ah - Maintenance Free	N25,000	N40,000	8	3	Edit Stock
CVJ-001	CV Joint - Toyota	N12,000	N22,000	5	3	Edit Stock
CLT-001	Clutch Kit - Toyota	N55,000	N90,000	3	2	Edit Stock
TYR-002	Tyre 225/45R17 - All Season	N35,000	N55,000	10	4	Edit Stock
TYR-001	Tyre 205/55R16 - All Season	N30,000	N50,000	12	4	Edit Stock

Parts Catalogue — Search, filter, edit parts, and view low-stock alerts.

6.2 Stock Management

Use the stock adjustment feature to record stock movements (in/out/adjust). Low-stock alerts appear when quantity falls below the reorder level. All stock movements are tracked in an audit trail.

6.3 Excel Import

Bulk-import parts using the CSV import feature. The system validates the data and adds parts to the catalogue in one operation.

6.4 Parts Request Fulfillment

When a Technician requests parts, you will receive the request in the job detail. Review stock availability, approve or reject, and dispatch the parts. Dispatched parts are automatically deducted from inventory and added to the job.

Note: A confirmation modal shows stock status before finalizing dispatch. You can also reverse a dispatch to return items to inventory.

7. Finance Personnel — Invoices & Payments

Finance Personnel handle invoice generation, approval workflow, and payment recording.

7.1 Finance Settings

Under Operations > Finance, view and manage the VAT rate and labour type configurations. These settings are used when calculating invoices.

The screenshot displays the 'Finance settings' page in the 'Cedric Masters Autos Management' system. The left sidebar contains a navigation menu with sections: GENERAL (Dashboard, Appointments, Customers, Jobs), SALES (Inventory, Leads, Orders), OPERATIONS (Customer Vehicles, Parts, Finance, User Management), and a user profile 'test Admin'. The main content area is titled 'Finance settings' with the subtitle 'Manage labour rates and VAT configuration.' It is divided into two panels. The 'VAT configuration' panel shows a 'VAT rate (%)' of 7.5 with a 'Save' button and a note: 'This rate is applied when generating invoices.' The 'Labour types' panel includes a form to add new types with fields for 'Name' (e.g., Oil Change) and 'Fixed price (N)' (5000), and a table of existing types. The table has columns 'NAME' and 'FIXED PRICE', and includes 'Edit' and 'Delete' actions for each entry.

NAME	FIXED PRICE	
Gear Repair	N200,000.00	Edit Delete

Finance Dashboard — Configure VAT, manage labour types with fixed prices.

7.2 Invoice Generation

From any job detail page, generate an invoice. The invoice auto-calculates totals from parts and labour line items, applies VAT at the configured rate, and locks line items at the time of generation.

7.3 Manager Approval

Generated invoices require Manager approval before they are finalized. The invoice status shows its current stage in the approval workflow.

7.4 Payment Recording

Record payments against invoices using the payment panel on the job detail page. Supported methods:

- Cash
- Bank Transfer
- Card / POS

Partial payments are supported with automatic balance tracking. When fully paid, the job auto-transitions to "Paid" status.

7.5 Invoice Regeneration

If job items change after invoice generation, use the "Regenerate" button to re-sync the invoice with the latest items.

7.6 Printable Invoice

Each invoice can be printed in a clean, print-friendly format via the Print button.

8. Manager — Oversight & Approvals

Managers have broad access across all modules for oversight. Your key actions include approving invoices, monitoring workshop progress, and managing customer relationships.

8.1 Dashboard & Monitoring

The Dashboard gives you a real-time view of open jobs, in-progress work, vehicles ready for pickup, and customer metrics for the month.

Dashboard — KPI cards, active jobs, recent check-ins for full oversight.

8.2 Invoice Approval

Review and approve invoices generated by Finance Personnel. Navigate to the job detail to see pending invoices and approve them with a single click.

8.3 Job Completion

Managers (and Admins) can mark jobs as "Completed" after work is finished. This is a restricted action as Technicians and CSRs cannot complete jobs.

8.4 Customer & Vehicle Viewing

Access the full customer database and vehicle directory to review service history and customer details.

8.5 Sales Overview

View sales inventory, leads pipeline, and sales orders. Monitor lead stages and review sales team performance.

Sales Orders — Order list with deposit and balance tracking.

9.4 Recording Payments

On the order detail page, record customer payments. Track deposits and remaining balances. Partial payments are supported.

9.5 Delivery Handover

When a sale is complete, use the Delivery Handover checklist. The checklist covers:

- Keys handover
- Owner's manual
- Toolkit
- Vehicle inspection

The handover is recorded against the sales rep.

Quick Tips

- Use the sidebar to navigate between sections. Your role determines visible menu items.
- The search bar at the top adapts its placeholder based on your current page.
- Toggle dark mode using the sun/moon icon in the top bar.
- Your profile (top-right corner) shows your name, email, and role. Sign out from there.
- All actions on the system are logged for accountability.
